IIGE Kick-off Symposium

4th KU-COIL Workshops and International Symposium

INNOVATIVE IDEAS AND PRACTICES FOR GLOBAL EDUCATION IN THE 21ST CENTURY

Kansai University has been at the forefront of COIL initiatives in Japan and has recently been awarded significant MEXT funding to further support COIL practices as a component of the new Institute for Innovative Global Education (IIGE). Following from last year's KU-COIL Workshops and International Symposium that focused on pedagogical concerns and issues in international education, this year the workshops and symposium will afford for explorations of issues relating to the further development and growing visibility of COIL initiatives in light of the newly established IIGE.

In this respect, themes of interest may include the management and development of COIL related activities with growing institutional and community awareness, how to manage formal institutional and national level collaborations (e.g., Japan and the United States), reviews of initiatives and project status, showcasing COIL pedagogy and practices, explorations of new technology and apps development, and pragmatics of administrative and logistics issues such as partner matching and facilitation.

We invite faculty members, international education and study abroad managers, and anyone interested.

7 · 8 · 9 DECEMBER 2018

AV LARGE HALL, SHOBUNKAN

SENRIYAMA CAMPUS, KANSAI UNIVERSITY

OSAKA-JAPAN

We are excited to invite speakers and experts in global learning and the internationalization of higher education from around the world.
