Privacy Policy

With regards to personal information received on application which is liable to specify the individual (hereafter "Personal Information"),

Kansai University Graduate School (hereafter "the Graduate School") will treat the information carefully in accordance with applicable laws and the Kansai University Graduate School Privacy Policy.

The Kansai University Graduate School Privacy Policy can be found on the top page of the Graduate School's website (<http://www.kansai-u.ac.jp>) under "Privacy Policy."

1. Use of Personal Information

Personal Information from applicants is used only for the following purposes:

- (1) To operate entrance examinations (receipt of applications, delivery of admission forms, and holding of entrance examinations)
- (2) To announce examination results
- (3) To complete procedures up to enrollment

2. Management of Personal Information

The Graduate School has assigned a personal information protection administrator to ensure that Personal Information from applicants for the three purposes listed above is managed carefully and deleted appropriately in accordance with applicable laws and rules thereafter.

3. Sharing of Personal Information

The Graduate School will share some Personal Information with Kansai University Kyosaikai (an affiliated organ of Kansai University for mutual-aid program) to enhance life on campus.

The Personal Information to be shared and its purposes;

- * Administrative numbers, names, address, phone number, dates of birth, assigned graduate school, major, and field of specialization for applicants paying enrollment and registration fees for verification of entry.

4. Disclosure of Personal Information to third parties

With the exception of contractors described in 5 below, the Graduate School will not share Personal Information with third parties without the consent of the applicant, except when compelled by law.

5. Sharing of Personal Information with Contractors

The Graduate School may share some Personal Information with contractors in order to carry out the operations described in 1 above. In such cases it shall contract them to handle the Personal Information appropriately based on its Privacy Policy.

6. Statistical data on entrance examinations

The Graduate School compiles statistical data about entrance examinations but does not identify applicants. This data will be used for individuals interested in the Graduate School, and utilized to analyze the Graduate School's future entrance examinations.

7. Disclosure, correction, and deletion of the Personal Information

When requested by an applicant to disclose, correct, or delete his or her Personal Information, the Graduate School will accommodate that request promptly in accordance with applicable laws, rules, and other guidelines after verifying the applicant. Data pertaining to the entrance examination score will not be disclosed.

8. Inquiries

Inquiries concerning applicants' Personal Information, including requests to disclose, correct, or delete it, will be directed to Graduate School Admissions Division of Kansai University Admissions Center.

Graduate School of Science and Engineering Special Entrance Examination for Recommended International Students for Spring semester 2020 admission

1. Purpose of the Graduate School of Science and Engineering Special Entrance Examination for Recommended International Students

To open the doors to students from overseas, the Kansai University Graduate School of Science and Engineering offers a special entrance examination for students of its overseas partner universities. Refer to the following overview of the Graduate School when applying for admission.

2. Overview of the Graduate School of Science and Engineering

(1) About Kansai University and the Graduate School of Science and Engineering

Kansai University is more than 130 years old since the Kansai Law School, its predecessor, was founded. Its history as a university began in 1922, and as of 2019, the institution becomes one of the leading universities in the west of Japan with more than 30,000 undergraduate and graduate students studying in 13 faculties, 13 graduate schools, and 2 professional graduate schools.

The Faculty of Engineering was established in 1958, and the Graduate School of Engineering opened four years later. The Graduate School has trained numerous engineers and researchers, and its graduates are active in a broad range of fields in Japan and overseas countries. In 2007, the Faculty of Engineering was reorganized into the Faculty of Engineering Science, the Faculty of Environmental and Urban Engineering, and the Faculty of Chemistry, Materials and Bioengineering. As a result the Graduate School of Engineering became the Graduate School of Science and Engineering in 2009.

The Graduate School of Science and Engineering is dedicated through its educational programs to training researchers and engineers to implement its philosophy of 'Praxis Learning' by way of science and technology. It welcomes applicants who possess not only the necessary level of basic academic skills, but also the wish to master research skills in a field of specialization through serious study and to contribute to society and humankind through the development of natural science and technology.

(2) Organization of the Graduate School of Science and Engineering

The Graduate School of Science and Engineering's Master's Degree Program offers nine disciplines including four under Engineering Science Major (Mathematics, Pure and Applied Physics, Mechanical Engineering, and Electrical and Electronic Engineering), three under Environmental and Urban Engineering Major (Architecture, Civil, Environmental and Applied System Engineering; and Energy and Environmental Engineering), and two under Chemistry, Materials and Bioengineering Major (Chemistry and Materials Engineering, and Life Science and Biotechnology) in order to endow graduates with specialized knowledge and technological skills. In addition, the Graduate School's Ph.D. Degree Program consists of the same nine disciplines under Integrated Science and Engineering Major. The program is designed to endow graduates with exceptional research skills as well as broad knowledge and technological skills that enable them to integrate various research domains.

(3) The Graduate School of Science and Engineering's educational system and requirements for program completion

Students who have been admitted to one of the discipline of Master's Degree Program by the Special Entrance Examination for Recommended International Students from overseas partner universities will take an educational program known as the International Master Course. This program is characterized that lectures are offered in English and students can earn their degree through research guidance in English. In addition to specialized subjects in each field, available lecture subjects include courses to master knowledge about Japanese history and culture. Concerning research, students take required seminar subjects by their advisors and receive research guidance to help them draft their master's thesis.

Students who have been admitted to Ph.D. Degree Program will study only seminar subjects by their advisors, dedicating rest of their time to activities for the drafting of their doctoral thesis.

In the Graduate School of Science and Engineering, each student drafts his or her master's thesis or doctoral thesis under the guidance of one principal advisor and two assistant advisors. While students of Master's Degree Program are required to spend their time for attending, preparing for and reviewing the lectures content, in order to take the program's lecture subjects, they spend the rest for activities necessary for the drafting of their master's thesis, such as personal study, experimentation, and discussion, primarily under the guidance of their principal advisor. Students of Ph.D. Degree Program spend most of their time for research to draft their doctoral thesis under the guidance of their principal advisor. Since education and research guidance offered by the principal advisor comprises an extremely dense experience, applicants to the Graduate School of Science and Engineering need to clarify not only a desired discipline, but also a principal advisor.

To complete Master's Degree Program, students must as a rule be enrolled for two years (four semesters), during which time they must earn at least 30 credits of subjects (including eight credits of seminar subjects) and submit their master's thesis. An additional objective is to increase the quality of research in their master's thesis and present their findings to academic societies or submit them to academic journals during the period of their enrollment.

To earn their degree from Ph.D. Degree Program, students must earn eight credits of seminar subjects and submit their doctoral thesis. In addition, one of the requirements for submitting their doctoral thesis is to publish it on an academic journal. The standard period of enrollment is three years (six semesters), although that period may be shortened.

3. Admissions Policy

The rapid expansion of science and technology demands qualified researchers and engineers who obtain the ability to discover and solve problems along with a broad perspective that encompasses various fields. The Graduate School of Science and Engineering seeks to educate the students for researchers and highly skilled professionals who will utilize their academic experiences to contribute to the improvement of the human welfare in the perspective of science and engineering. Applicants should possess a certain level of scholastic ability as well as intellectual curiosity and mental strength to pursue their studies. In addition to the General Entrance Examination, the Graduate School offers a variety of entrance examinations including an Entrance Examination for International Students and Entrance Examination for Mature Students as part of its commitment to actively accept students from different backgrounds.

4. Admitting Program Majors and Disciplines

Program	Major	Disciplines
Master's Degree	Engineering Science	Mathematics
		Pure and Applied Physics
		Mechanical Engineering
		Electrical, Electronic and Information Engineering
	Environmental and Urban Engineering	Architecture
		Civil, Environmental and Applied System Engineering
		Chemical, Energy and Environmental Engineering
	Chemistry, Materials and Bioengineering	Chemistry and Materials Engineering
		Life Science and Biotechnology
Ph.D. Degree	Integrated Science and Engineering	Mathematics
		Pure and Applied Physics
		Mechanical Engineering
		Electrical, Electronic and Information Engineering
		Architecture
		Civil, Environmental and Applied Systems Engineering
		Chemical, Energy and Environmental Engineering
		Chemistry and Materials Engineering
		Life Science and Biotechnology

5. Enrollment Capacity

Both Master's Program and Ph.D. Program, recruiting few people at each discipline.

6. Qualifications

Master's Degree Program

Applicants who satisfy one of the following conditions:

- (1) Applicants who satisfy both of the following conditions:
 - a. Applicants who have graduated within one year from or are expected to graduate from a university that has been designated by the Graduate School before enrolling.
 - b. Applicants who receive a recommendation from the president of the university or the dean of the faculty from which they have graduated or are expected to graduate and who have a strong desire to enroll the Graduate School.
- (2) Notwithstanding the requirements outlined in (1) above, applicants who have a strong desire to enroll the Master's Degree Program's International Master Course and who have been authorized to take the Special Entrance Examination for Recommended International Students by Committee of the Graduate School of Science and Engineering.

Ph.D. Degree Program

Applicants who satisfy one of the following conditions:

- (1) Applicants who satisfy both of the following conditions:
 - a. Applicants who have earned or are expected to earn a degree equivalent to a master's degree from a graduate school that has been designated by the Graduate School before enrolling.
 - b. Applicants who can receive a recommendation from the president of the university or the dean of the graduate school from which they have earned or are expected to earn the degree and who have a strong desire to enroll the Graduate School.
- (2) Notwithstanding the requirements outlined in (1) above, applicants who have a strong desire to enroll the Ph.D. Degree Program's International Ph.D. Course and who have been authorized to take the Special Entrance Examination for Recommended International Students by Committee of the Graduate School of Science and Engineering.

7. Application method and schedule

Before application process (Contact the Graduate School Admissions Division.)

Before completing the application process, be sure to E-mail by your university's staff the following information to the Graduate School Admissions Division:

- (1) Your name
- (2) Your interest in taking an admission examination for the university
- (3) The name of the university and faculty (or graduate school) at which you are enrolled (or from which you graduated), your major, etc.
- (4) The date on which you graduated from (completed) the program or expect to do so
- (5) The program and discipline in which you are interested
- (6) Your desired faculty advisor (see "List of Academic Advisor of Graduate School of Science and Engineering for the 2020 academic year" later in this document)
- (7) The discipline in which you wish to conduct research and the specific nature of the research in which you are interested, etc.

Contact Address:

Graduate School Admissions Division, Admissions Center

E-mail: kugrd-exam@ml.kandai.jp

Application process

You must complete all of the following steps in order to apply.

Only applicants who have received permission from the desired advisor will be allowed to submit their application documents.

[1. Submitting the application documents]

Applicants should submit their application documents to the university from which they have graduated or are expected to graduate by Thursday, November 14, 2019 (All documents must be submitted by the deadline.)

<Request for the university recommending the applicant>

Please attach a recommendation to the application of each of your students and submit all of those applications together to the Graduate School Admissions Division by Thursday, November 21, 2019. (All documents must be received by the deadline.)

Please note that documents submitted individually by the applicant will not be accepted.

We will notify you of the results of the qualification screening (indicating whether your application has been accepted or not based on your application documents) through the university from which you have graduated or are expected to graduate on the following date:

Thursday, December 12, 2019

If your application has been accepted by the Graduate School of Science and Engineering, pay the application fee during the designated period.

[2. Paying the application fee]

- (1) Application fee: ¥35,000

Please note that the application fee is non-refundable.

Once you have paid the application fee, as a general rule it cannot be refunded.

However, in case of overpayment, refunds may be given. In this case, please contact the Graduate School Admissions Division within seven days of the dead line for the application procedures (2).

- If you paid an amount exceeding the predetermined application fee (including duplicate payments), the overpaid amount will be refunded.

*If the fee was paid by credit card, or the overpaid amount needs to be refunded to your overseas bank account, the necessary bank transfer fee will be deducted.

(2) Payment period

Friday, December 20, 2019 to Friday, January 10, 2020

(3) Payment method

Applicants who have been approved by the Graduate School of Science and Engineering will be notified of the guide of payment method.

Please note once your application has been approved by the Graduate School of Science and Engineering, you must pay the application fee by the designated deadline using the payment method specified by the University.

The application process is completed with the payment of the application fee.

8. Application documents

Applicants must submit all of the documents listed below to the university from which they have graduated or are expected to graduate.

Clearly note the document number at the lower right of each application document based on the separate official form entitled “List of application documents (checklist).” Documents will not be returned once they have been accepted by the University.

Document to be submitted (document number)	Remarks
Documents to be submitted by all applicants	
Application form ①	Use the form designated by the University.
Statement of reason for applying in English ②	Use the form designated by the University.
Original transcript from previously attended university (graduate school), or notarized document certifying courses and grades ③	Original document only. Document must be in English. If you transferred from other universities/institutions to the university from which you have graduated or are expected to graduate, submit all the transcripts as well.
Original certificate of (expected) graduation or completion from previously attended university (graduate school) or notarized document certifying (expected) graduation or completion ④	Original document only. Document must be in English. This document does not need to be submitted if your transcript indicates or certifies your (expected) graduation or completion.
Research plan in English ⑤	Applicants to the Master Degree Program. About 1,000 words in length. Applicants to the Ph.D Degree Program. About 2,000 words in length. Submit one original and three copies.
Letter of recommendation in English ⑧	The letter must bear the signature (including the position/ title and name) and seal of the president of the university or the dean of the faculty (graduate school) from which you have graduated or are expected to graduate.
Copy of ID or passport ⑨	For a passport, submit a copy of pages showing your name, date of birth, photograph, expiration date, and history of past entries to and departures from Japan (if you have previously been to Japan).
Two photographs	Affix a photograph taken within the last three months to each of the application form and to the statement of reason for applying in English. (The photograph affixed to your application form will be used on the student ID that is issued after enrollment.)
List of application documents (checklist)	Use the form designated by the University.
Applicants to the Ph.D. Degree Program who have already submitted a master's thesis	
Copy of master's thesis ⑥	4 copies If the master's thesis is written in a language other than English, submit an English version.
Outline of master's thesis in English ⑦	About 2,000 words in length. Submit one original and four copies.
Applicants to the Ph.D. Degree Program who expect to submit a master's thesis	
Copy of the thesis or a draft you plan to submit ⑥	4 copies If the master's thesis is written in a language other than English, submit an English version.
Outline of the thesis or a draft you plan to submit in English ⑦	About 2,000 words in length. Submit one original and four copies.

Submit your transcript or certificate of (expected) graduation on which both of the entrance and (expected) graduation dates are listed.

9. Screening method

The Graduate School will make screening based on application documents, considering recommendations from the designated partner universities.

10. Announcement of the screening results

Your results of success or failure will be sent to the applicant by international express mail service (EMS) on the following date:

Friday, February 28, 2020

11. School fees and other fees

Refer to "School fees and other fees for the 2020 academic year" (page 9) below.

12. Enrollment steps

Successful applicants must complete the following enrollment process by the designated deadline.

You will not be able to enroll if you fail to complete the process by the deadline.

(1) Enrollment step I-(1) (payment of Admission fee)

Be sure to remit payment no later than the day before the enrollment deadline as described in the information about the payment method that is enclosed with the notification of admission.

Please note that the admission fee is non-refundable.

(2) Enrollment step I-(2) (payment of tuition, and other fees)

Enrollment step II (submission of documents)

Enrollment documents will be sent together with notification of the results. Pay tuition and other fees and submit the required documents in accordance with the instructions on the Enrollment Process Information (II) that you receive.

You must remit payment of tuition and other fees no later than the day before the enrollment deadline.

Please contact the Graduate School Admissions Division in the following cases:

- If your address changed after you passed the entrance examination

Enrollment step I-(1) (payment of admission fee) Enrollment step I-(2) (payment of tuition and other fees) Enrollment step II (submission of documents)	Friday, February 28, to Monday, March 16, 2020
---	---

*Requests to withdraw

Enrollees who request to withdraw by Tuesday, March 31, 2020, for a legitimate reason and who submit a letter of withdrawal from the university from which they have graduated or are expected to graduate (a document bearing the signature [including the position/title and name] and seal of the president of the university or the dean of the faculty [graduate school]), can request to be refunded tuition and other fees.

If you intend to withdraw, inform the university from which you have graduated or are expected to graduate immediately. The Graduate School does not accept requests directly from applicants.

Fees will not be refunded unless the Graduate School receives your request to withdraw from the said university by Tuesday, March 31, 2020.

(For specific steps, see the Enrollment Process Information (II).)

13. Others

- (1) For the information on scholarship, please refer to page 10. We also offer a variety of scholarship programs for international students in order to support students' study and research activities. For more details, contact the Kansai University Division of International Affairs (kokusai@ml.kandai.jp).

※Please note there is no scholarship programs specifically for applicant who have been admitted under this examination.

- (2) The University can apply for Eligibility Certificate required for a student visa, on behalf of overseas residents planning to enroll in the Graduate School.

For full information, please check the following website:

【Support for Obtaining Visa】 http://www.kansai-u.ac.jp/Gr_sch/international/index_en.html#a_visa

14. Precautions concerning applying

- (1) Once you have applied, you may not change your major, discipline, or research discipline.
- (2) Your desired advisor may be changed. Notification of any such changes will be made beforehand to the university from which you have graduated or are expected to graduate, so be sure to check before you apply.
- (3) Fill your desired major, discipline, and research field in the designated spaces on the application documents.
- (4) Enter your desired major, discipline, and research field in the designated spaces on the application documents after referring to the "List of Academic Advisors of Graduate School of Science and Engineering for the 2020 academic year" (pages 13 to 50).
- (5) The application documents must be completed using either black ink or a ballpoint pen. The University's designated forms must be completed by hand. If using a computer or typewriter, you must print directly on the designated forms.
- (6) If the name on the certificate differs from the name under which you are applying, submit a separate official certificate or other document that establishes your identity.
- (7) Certificates must be in English. If you are submitting one or more certificates in another language, you must also submit a English translation that has been certified by an embassy or other public institution.
- (8) Once received, documents will not be returned.
- (9) The Graduate School will make special arrangements in the learning environment after enrollment for individuals with special needs such as physical disability, injury, illness, or other circumstances. Please contact the Graduate School Admissions Division before you apply.
- (10) Applicants who have passed this entrance examination may not withdraw from enrollment unless they have any legitimate reasons.

Notes

1. Graduates of Kansai University or a Kansai University Graduate School, and undergraduates at the university who satisfy the requirements described by 1-11 of Article 46 Paragraph of the Graduate School Rules are not required to pay the admission fee (enrollment and registration fee) when continuing their studies at one of the university's graduate schools.
2. The University collects ¥10,000 at the time of enrollment and then ¥20,000 the following academic year on behalf of the Alumni Association. Dues are not collected from students who have already paid them as graduates of the university (including any of its graduate schools).

Scholarships Information

Scholarships available for the 2020 academic year:

The scholarships listed on this page are available for students enrolling at the spring semester of the 2020 academic year.

* In all cases, only a small number of recipients are available. For more information such as records about scholarships, contact the staffs put at the bottom of this page.

[1] Kansai University Graduate School Scholarship (awarded for the persons with excellent grades in the Graduate School) (to currently enrolled students)

Award-type * Application-based

Eligibility	Graduate School students with excellent grades who are in difficulty to continue to study for economic reasons.
Awards Amount	See the figure below.
Duration of Award	for one year (You can apply next year again.)

[2] Kansai University Mature Students Scholarship (awarded for excellent working adult graduate students)

Award-type * Application-based

Eligibility	Mature Graduate School students with excellent grades who have gained superior accomplishment in their Graduate School.
Awards Amount	See the figure below.
Duration of Award	for one year (You can apply next year again.)

Awards Amount

Degree Program	Yearly Awards Amount (yen)
Master's Degree Program	375,000
Ph.D. Degree Program	250,000
