2025年度 関西大学の教育に関する三つの方針 (大学院)

理念・目的
 関西大学は、「学の実化(がくのじつげ)」を学是(理念)として掲げ、教育研究活動を展開しています。これは、大学が研学の府として学問における真理追究だけに終わるのではなく、社会のあるべき姿を
 提案し、その必要とするものを提供することによって「学理と実際との調和」を求める考え方です。
 この「学の実化」を実現するために、不確実性の高まる社会の中で困難を克服し未来を切り拓こうとする強い意志と、多様性を尊重し新たな価値を創造することができる力とを有する人材を育成します。

[Graduate School of Law]

Diploma Policy	Curriculum Policy	Admission Policy
The Graduate School of Law awards a master's degree (law) to	The Graduate School of Law aims to foster researchers or highly specialized professionals who have	The Graduate School of Law accepts those who are ready
students who have completed the designated subjects, acquired the	sufficient knowledge of law and political science and can actively and effectively utilize it in various	to contribute to democratic decision making with logical

prescribed credits, and submitted a thesis under the guidance of the academic advisors within the prescribed period of years by the Graduate School. The Graduate School evaluates the qualification of students according to the appraisal of the levels of acquisition of the following knowledge and abilities:

1. Knowledge and Skills

To have acquired the knowledge required to act as researchers or highly specialized professionals of law or political science (knowledge of current laws or modern politics through understanding the historical and ideological backgrounds), to have acquired the skills to find out appropriately and promptly various kinds of information among the judicial precedents, trends of theories, or recent political conditions, and to have acquired the abilities to analyze them comprehensively from the view point of law or political science and to respond flexibly.

- 2. Abilities of Thinking, Judgement, and Expression To be able to tackle with various social problems of the modern society from a wide range of perspectives based on the overseas trends as well, to explain them scientifically by accurately understanding of the legal or political systems, to develop convincing arguments based on the norms and historical experiences, by studying the specialized subjects and reading foreign materials l, and ultimately to have acquired the "Think and Act" capabilities in order to contribute to building democratic decision making. To have acquired the ability to discover unresolved issues and the ability to solve problems based on fair and flexible thinking by analyzing specific legal disputes or political situations through legal or political thinking.
- 3. Proactive Attitudes

To have acquired the attitude to select a significant research theme based on the development of judicial precedents and theories, the recent political situation and the future career path as a researcher or highly specialized professionals, set unresolved issues, formulate an appropriate research plan to solve the issues and conduct research activities based on the plan.

To have acquired the attitude to engage in academic dialogue and exchange through research presentations in classes, conferences and fields of society by acquiring knowledge and skills, qualities and abilities, and attitudes according to the Diploma Policy. The Graduate School arranges the legal and political studies course to nurture researchers, the highly specialized professional course to nurture highly specialized professionals, and the global cooperation course to improve the professional abilities of foreign students and their academic contributions to their home countries. The curriculum is configured on the basis of the following items:

- 1. Educational Contents:
 - (1) Knowledge and Skills

The legal and political studies course aims to nurture research ability and basic academic knowledge necessary for independent research activities. The students are supposed to take seminars in each academic year, in principle, under the guidance of the same academic advisor while at the Graduate School. Through the lectures mainly composed of specialized subjects and the foreign literature studies, the students can also acquire the ability to read and understand foreign materials, which is necessary for researchers.

The highly specialized professional course and the global cooperation course aim to foster highly specialized professionals with expertise. Students are supposed to receive specialized education in a more practical way which consists of basic subjects, lecture subjects and seminar subjects. In the basic subjects, students acquire basic knowledge and academic skills in law and political science. In the lecture subjects, students will learn advanced specialized knowledge about current laws and contemporary politics, with historical and ideological backgrounds, and will analyze and discuss various issues of contemporary society from multiple perspectives. In the seminar subjects, students are mainly instructed to prepare their master's thesis or research report on a specific theme.

(2) Abilities of Thinking, Judgement, and Expression

Students acquire the ability to think, judge, and express themselves through the seminar subjects. In the legal and political studies course and the global cooperation courses, seminars for master's thesis are regularly guided by the academic advisor. In the highly specialized professional course, each student receives the guidance from a dedicated teacher in the first year and the student will be advised appropriately about the research themes of the specialized field in for the second year. Students acquire problem-solving skills by taking the general seminar (Theme). Guidance for master's thesis or research report on a specific theme in the second or third year is given by the academic advisor whom the students can select by their own request. (3) Proactive Attitudes

Students will develop a proactive attitude by formulating their own research plan, reporting on the progress and results of their research to their academic advisor and others in classes, etc., and preparing and submitting the Annual Research Results Report to the Dean of the Graduate School. The Graduate School prepares opportunities to enable students to report their research and convincing arguments based on accurate expertise in political society and on necessary information. Applicants are therefore required:

- To have the basic expertise in the historical development of existing legal and political institutes which is necessary for a researcher or a highly specialized professional, to have enough knowledge to understand arguments in foreign countries about legal and political issues, and to have the sufficient ability to exactly express their own views and exactly understand others' views.
- 2. To show willingness to admit the significance of different views derived from different cultures and values, to make a scientific explanation with accurate knowledge on legal and political institutes, and to reach a mutual agreement by convincing plausible arguments well founded on norms and history.
- 3. To have the abilities of problem solution based on fair and flexible thinking, to have an active interest in social phenomena, to form their own opinions about them by reference to expertise in legal and political institutes, to act for problem solution by reconciling different interests and values in a democratic way, and to suggest their own solution in the form of master's thesis or research report on a specific theme.

seminars and submissions to academic journals.	results through on-campus and off-campus academic meetings and conferences, or through
	submissions to academic journals such as The Journal of Law and to give ethics training
	necessary for carrying out research. In addition, classes conducted from a practical point of
	view will make students aware of the relationship between theory and practice, thereby
	enhancing their motivation to work.
	2. Evaluation of Learning Achievements:
	(1) Knowledge and Skills
	The Graduate School, mainly in basic subjects and lecture subjects, evaluates students'
	acquisition of knowledge and skills by the understanding of advanced specialized knowledge in
	law and political science, the ability to provide logical and scientific explanations, the ability to
	construct well-reasoned and persuasive arguments and the ability to draw reasonable
	conclusions in discussions with others.
	(2) Abilities of Thinking, Judgement, and Expression
	The acquisition of the abilities of thinking, judgement, and expression will be evaluated
	through the examination of the master's thesis or of the research report on a specific theme as
	well as the seminar subjects. The evaluation criteria require that each master's thesis or
	research report on a specific theme satisfy a sufficient level of the comprehensive and analytical
	research results of a specific theme of law or political science, or of the research results worth
	for proceeding policy proposal based on research and analysis. The research report on a specific
	theme does not necessarily have to be original and academically specialized, but it must show a
	high level of ability required for a highly specialized profession.
	The Graduate School evaluates comprehensively the master's thesis or the research report on a
	specific theme based on the following criteria:
	i. Awareness of the problem and setting of the issue should be clearly stated.
	ii. The structure, development, and written expression of the paper should be appropriate.
	iii. Research, analysis and citation of previous studies and materials should be appropriate and
	sufficient.
	(3) Proactive Attitudes
	As for the acquisition of a proactive attitude, we estimate the attitude toward the formulation
	and implementation of research plans through the research plans and research reports in the
	seminar subjects, and the examination of the master's thesis or of the research report on a
	specific theme.

	Diploma Policy	Curriculum Policy	Admission Policy
Ī	The Graduate School of Law awards a doctor's degree (law) to	The Graduate School of Law aims for the students to acquire knowledge and skills, qualities and	The Graduate School of Law accepts those who have ability

students who have completed the designated subjects, acquired the prescribed credits, and submitted a thesis under the guidance of the academic advisors set by the Graduate School within the prescribed period of years. Specifically, the Graduate School judges students' appropriateness to receive a doctor's degree based on their acquisition of the following knowledge and abilities:

1. Knowledge and Skills

To have acquired the knowledge required to act as independent researchers of law or political science (knowledge of current laws or modern politics through understanding the historical and ideological backgrounds), to have acquired the skills to find out appropriately various kinds of information among the judicial precedents, trends of theories, or recent political conditions and to have acquired the abilities to analyze them comprehensively from the viewpoint of the law or political science and to respond flexibly.

2. Abilities of Thinking, Judgement, and Expression To have acquired a wide-range of perspectives by collecting, translating, and comprehending foreign literatures and the abilities to work on various social issues in modern society by understanding foreign legal or political systems, to have the ability to explain such social issues scientifically based on their correct understanding of the legal or political system, to develop convincing arguments based on the norms and historical experiences, and ultimately to have acquired the "think and Act" capabilities in order to contribute to building democratic decision making.

3. Proactive Attitudes

To have acquired the abilities to analyze specific legal disputes or political circumstances through legal or political thinking, to set up the theme of the doctor's thesis on an unresolved issue, and to suggest a resolution based on an original and significant theory, and to have acquired the ability to solve the problems based on fair and flexible way of thinking, by presenting the original and significant theory at an academic meeting and conference or posting it to an academic journal in order to improve the persuasiveness of the above metioned resolution. abilities, and attitudes according to the Diploma Policy of the Graduate School and foster the researchers who have sufficient knowledge of law and political science and can actively and effectively utilize it in various fields of society. The Graduate School sets the legal and political studies course which configures its the curriculum on the basis of the following points. 1. Educational Contents:

(1) Knowledge and Skills

Ph. D. Degree Program aims to nurture more advanced research ability and rich basic academic knowledge necessary for independent research activities. The students are supposed to take seminars of small class in each academic year, in principle, under the guidance of the same academic advisor while at the Graduate School. Through the lectures mainly composed of specialized subjects and the foreign literature studies, the students can also acquire the ability to read and understand foreign materials, which is necessary for researchers.

(2) Abilities of Thinking, Judgement, and Expression

In Ph. D. Degree Program, seminars for doctor's thesis are regularly guided by the academic advisor.

(3) Proactive Attitudes

The Graduate School prepares opportunities to enable students to report their research results widely through on-campus and off-campus academic meetings and conferences, or through their posting to academic journals such as *The Law Review of Kansai University* and *The Journal of Law* and to give ethics training necessary for becoming researchers.

2. Evaluation of Learning Achievements:

(1) Knowledge and Skills

The Graduate School evaluates students' acquisition of knowledge and skills by the screening of their doctor's thesis. The evaluation criteria require that each doctor's thesis has an original and highly advanced academic content in the field of law or politics and is recognized to contribute to development of academics. The Graduate School evaluates each doctor's thesis comprehensively based on the following criteria:

i. whether the research content of the research has originality and expertise or not;

ii. whether the research is recognized to contributing to development of academics or not;

iii. whether the student's problem consciousness and issue setting are clarified or not;

iv. whether the structure, theoretical development, and writing expressions of the thesis are proper or not;

v. whether the thesis properly and sufficiently analyzes and cites preceding researches and materials or not.

(2) Abilities of Thinking, Judgement, and Expression

As for the lecture subjects, the Graduate School evaluates each student's ability to make logical and scientific explanations and well-grounded plausible argument through report and to research developed through master's degree program are ready to contribute to democratic decision making with logical and convincing arguments based on accurate and more advanced expertise in political society and on necessary information. Applicants are therefore required: 1. To have the more advanced expertise in the historical development of existing legal and political institutes which is necessary for a researcher or a highly specialized professional, to have enough knowledge on foreign languages to understand and express arguments in foreign countries about legal and political issues, and to have the sufficient ability to exactly express their own views and exactly understand others' views.

2. To have willingness to admit the significance of different views derived from different cultures and values, to make a scientific explanation with accurate knowledge on legal and political institutes, and to reach a mutual agreement by convincing arguments well founded on norms and history.

3. To have the abilities of problem solution based on fair and flexible thinking, to have an active interest in social phenomena, to form their own opinions about them by reference to more advanced expertise in legal and political institutes, to act for problem solution by reconciling different interests and values in a democratic way, and to suggest their own solution in the form of doctoral dissertation.

discussion for individual problems, and to lead a reasonable conclusion in discussions with
others.
(3) Proactive Attitudes
In the seminars conducted by the academic advisor, in particular, the Graduate School
estimates students' attitudes and abilities to study and solve individual problems by utilizing
their own knowledge and thinking. Through the screening of doctor's thesis, the Graduate
School evaluates the more specialized academic abilities of each student.
